CERTIFICATIONS

- CodingNinjas: Career Camp | Web Developer Track
- CodingNinjas: Career Camp | Web Development Module
- CodingNinjas: Career Camp | React
- Microsoft: HTML5 CSS3 Fundamentals

ACHIEVEMENTS

- Letter of Appreciation from University.
- Winner of inter-year Football League.

EXPERIENCE

BLACKNGREEN | SOFTWARE ENGINEER

May 2021 - Present | Gurugram

- Developing a **robust** and **customizable** user management system for enterprise applications, allowing efficient management of user accounts, roles and permissions.
- Implementing **role-based access** control (RBAC) to ensure authorized user access to specific application features. Created and managed user roles, and effectively assigned roles to maintain security and confidentiality.
- Developed a **sturdy** design to build **scalable** and **maintainable** systems for storing data for various promotions (USSD, IVR, and SMS) for divergent customers.
Exposure: Java, Spring-Boot, RESTful API, security and MySQL.
- Developed a **zero balance platform** that provides loans to users based on responses received from operators, ensuring **seamless processing** of loan requests. Implemented a **high-performance** system capable of handling **200 transactions** per second (TPS) API calls, optimizing system **performance** and **scalability**.
- Developed a campaign **recommendation** platform that **analyzes** multiple campaigns based on **priorities** and suggests the most suitable campaign for implementation, optimizing campaign **performance and ROI**. The system **automates** the execution of the selected campaign, ensuring **smooth** and **efficient** campaign operations.
- Designed and implemented a **user-friendly** web flow for various services, allowing **seamless** subscription for services and **enhancing** user experience.
- Took responsibility for creating an **internal portal** to blacklist and whitelist numbers and IPs during different wap promotions, enhancing **data integrity** and **security**.

Technologies: HTML, CSS, Javascript, PHP, and SQL.

ZEALTH-AI (YC W21) | FRONT-END DEVELOPER - INTERN

Sep 2020 - May 2021 | Delhi

- Contributed to the development of **CareShare**, the official product of Zealth-AI, by creating **functional** and **visually appealing** user interfaces.
- Developed Reports uploading user interface for the Zealth app, enhancing **data management** and **analysis** capabilities.
- Implemented **in-App notifications** support for various features, improving user engagement and experience.
- **Technologies:** HTML, CSS, and Javascript.

PERSONAL PROJECTS

HOUSE-LET | MERN

- One-stop platform where you can search for houses as well as tenants.
- Implemented filter functionality through which tenants can filter properties based on rent, size and city.
- Project Link: [House-Let](#)
